### NOTES

**Moz Ranking** is a score (on a 100-point scale) developed by Moz that predicts how well a website will rank on search engines. It includes factors such as the number of links to your site; the number of domains linking to your site, how trustworthy your site seems and so on.

**Alexa** is a company owned by Amazon which provides web analytics. It collects traffic data from a panel of a few million users worldwide, then calculates a rank based on total traffic plus total pageviews.

**Ahrefs** also provides web analytics. It is generally considered to have the largest backlink database available. (Backlinks are links from other sites to your) The Ahrefs rank is based on number and quality of backlinks.
